**The National Research Center For CTE ... 'The Use Of Assessment Data',
Dr. Sandra Pritz**, The National Research Center and NOCTI Senior Consultant

How CTE educators use technical assessment data to improve program curriculum and identify individual/group instruction needs is of particular interest to the National Research Center for CTE. How specific types of professional development may have been provided, educators' perception of the effectiveness of this training and finally, what types of professional development they would consider most effective for the future is vital to improving student achievement. Findings from the research and insights from the literature will be discussed, as well as implications for professional development that will be created will be part of this unique web seminar.

Bridging The Gap Between CTE and Academics,
Patrick Robinson, Retired BOCES Director, New York and NOCTI Senior Consultant

Curriculum integration has long been a Perkins requirement, yet is little understood. Learn the key steps used to identify, deliver, assess, and document the integrated core academic content in CTE programs at a level that would meet rigorous state and national core academic standards in mathematics and science that will bridge the 'gap' between CTE and Academics .
