

Announcing a **NEW** Book!

Putting Your Data to Work: Improving Instruction in CTE

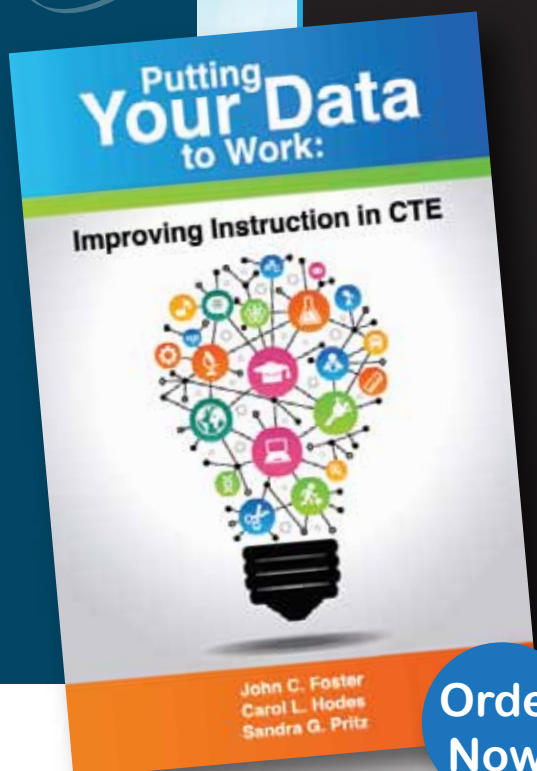

Discover a new perspective on the use of data-driven decision making and the positive impact it has in the CTE classroom! This book explores various aspects of data-driven improvement in instruction and specifically targets the importance of gradient objective technical skill assessment data. The concepts and "how-to" examples offered in this book are especially valuable for secondary, postsecondary, and adult educators. Don't wait to get started applying the valuable approaches to increasing the success of your students!

What the Experts are Saying about "Putting Your Data to Work"...

"This is a timely book for anyone in career-technical education. As educators, we understand that using the right data to impact instructional strategies is essential for increasing student performance. This book by Foster, Hodes, and Pritz is an excellent hands-on resource. The authors create a step-by-step process to select and analyze data and then to develop an action plan for its use. I certainly recommend it as a guide for career-technical education teachers and administrators."

– **Roberta White, Ph.D., President & CEO – Great Oaks Career Campuses**

"A book on data that speaks our CTE language. A valuable resource for all educators!" – **Bryan D. Albrecht, Ed.D., President and Chief Executive Officer – Gateway Technical College**
